Acknowledgments

The data for this report is collected through various sources such as the Canada Housing and Mortgage Corporation (CMHC), Statistics Canada, the Alberta Real Estate Association, the Calgary Real Estate Board, the Realtors Association of Edmonton, and various provincial government Departments.

Next Step

Our goal is to continue to share important information on a monthly basis on the housing market trends.

OVERVIEW

Welcome to the Housing and Urban Affairs' (HUA) Housing Bulletin. This marks our sixth and last issue of the monthly report for 2008, launched in June 2008. The report covers the latest housing market trends.

In December 2008, total housing starts in Alberta's centres with a population of 10,000 people and more, declined by 34 percent from 38,477 units in 2007 to 25,395 units in 2008. Year-to-date, total housing starts were down 32 percent in the Calgary Census Metropolitan Area (CMA) and 43.9 percent in the Edmonton CMA.

According to the Calgary Real Estate Board, the average house price listed on the Multiple Listing Services (MLS) in Calgary in December 2008 was \$417,398, compared to \$444,769 in December 2007, down 5.2 percent.

According to the Realtors Association of Edmonton, the average house price listed on the MLS in Edmonton in December 2008 was \$351,870, compared to \$382,022 in December 2007, down 7.9 percent.

Highlights

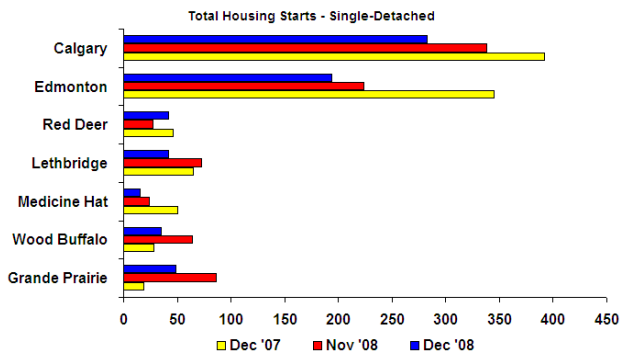

- The Royal Bank of Canada's (RBC) Affordability Index, measures the qualification of a typical family for a mortgage loan on a typical home across Canada. Affordability Measure is based on 25 percent down and a 25-year mortgage loan at a five-year fixed rate, and is estimated on a quarterly basis. A higher affordability index measure means it is more difficult to afford a house. For example, an affordability measure of 50 percent means that home ownership costs, including mortgage payments, utilities and property taxes, take up to 50 percent of a typical household's pre-tax income.
- According to the RBC quarterly *Housing Trends and Affordability Report*, released on December 8, 2008, Alberta's affordability ranks, on average, fourth highest among the provinces, behind British Columbia, Ontario and Saskatchewan.
- Alberta's affordability index in the third quarter of 2008 for a standard condominium was 28.2 percent (31.7 percent in 2007), 43 percent for a detached-bungalow (47.8 percent in 2007), 46.4 percent for a standard two-storey house (52.2 percent in 2007) and 32.1 percent for a standard townhouse (36.9 percent in 2007).

Housing Bulletin is now available for download from the ministry's internet site at <http://www.housing.alberta.ca/>

HOUSING MARKET TRENDS

HOUSING STARTS – Housing starts in Alberta’s seven largest centres totalled 968 units in December 2008 (down 42 percent), compared to 1,678 units in December 2007. In Alberta, total housing starts in areas with a population of more than 10,000 decreased by 34 percent, from 38,477 units in 2007, to 25,395 units in 2008.
